SCAP Metrics

Metricon 4.0: A Case Study

Ed Bellis VP, CISO
Orbitz Worldwide
Context Matters...

- Orbitz Worldwide
  - Orbitz & OFB
  - Cheaptickets
  - Away.com
  - eBookers
  - HotelClub & Rates2Go
  - Traveler Care
  - AA & NWA Booking engines
  - msn.orbitz.com
  - Southwest Hotels
  - Trip.com
  - Orbitzgames.com
  - RBS Rewards

...and on and on and on...
Context Matters...

- 100’s of Endless Applications
- 1000’s of Servers
- 1000’s of Devices
- 100’s of DBs
- Data centers: multiple continents
- Call centers - follow the sun

...and on and on and on and on...
Context Matters...

- VA Tools
  - Application
  - Network & Host
  - Database
- Remediation Tracking
  - Jira
  - Remedy

...and on and on and on...
Our Solution: A Case Study
Using Standards to Compare & Measure
Centralizing the Data: Overview
A Workflow Use Case

1. NVD feed is pulled in daily
A Workflow Use Case

2. Whitehat connector runs on a predefined schedule.
A Workflow Use Case

3. Qualys connector runs on a predefined schedule
A Workflow Use Case

4. Security Admin manages and modifies asset information discovered by VA tools - CPE
A Workflow Use Case

5. Vulnerability data is normalized and correlated across VA results utilizing CVE and WASC-TC. Vulns are scored using CVSS / WASC-TC plus Asset/CPE data.
A Workflow Use Case

6. Single click defect creation from Conduit to Jira.
A Workflow Use Case

7. Security defect is remediated by developer and closed in Jira.
A Workflow Use Case

8. Conduit issues re-test of vulnerability via Sentinel API
A Workflow Use Case

9. If re-test returns clean results are fed to Conduit and vulnerability is closed
A Workflow Use Case

10. Metrics can be viewed and filtered via tags added through asset mgmt
Metrics via Tag Lenses

- Pre-Defined Vulnerability Metrics
- Filtered by Asset Tags
- Many-to-Many Tag/Asset Relationship
The Standards

**Today**
- CPE: Common Platform Enumeration
- CVE: Common Vulnerability Enumeration
- CVSS: Common Vulnerability Scoring System
- WASC-TC: Web Application Security Consortium Threat Class

**Roadmap**
- CCE: Common Configuration Enumeration
- XCCDF: Extensible Configuration Checklist Description Format
